Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure in specification page 2, paragraph [0003] lines 2, (WWW.ietf.org) is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1-3 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-3 of prior U.S. Patent No. 6,694,145. This is a double patenting rejection.

Claim 1 of the present application and claim 1 of U.S. Patent No. 6,694,145 are identical including: a method of synchronizing signaling messages and multimedia content loading, comprising: at a callee terminal, processing a first signaling message transmitted from a caller terminal to initiate a multimedia session establishment by detecting, in said first signaling message, information indicating that said multimedia content should be presented in synchronization with a second signaling message necessary to session establishment;

downloading and presenting said multimedia content in accordance with said information indicating that said multimedia content should be presented in synchronization with said second signaling message; and delaying said second signaling message necessary to session establishment until after completing said step of downloading and presenting said multimedia content in accordance with said information indicating that said multimedia content should be presented in synchronization with said second signaling message.

Claim 2 of the present application and claim 2 of U.S. Patent No. 6,694,145 are identical including: wherein said first signaling message and said second signaling message respectively comprise a first SIP message and a second SIP message.

Claim 3 of the present application and claim 3 of U.S. Patent No. 6,694,145 are identical including: wherein the first SIP message is a SIP INVITE message.
